

Society of Petrophysicists and Well Log Analysts

49th Annual Logging Symposium

Edinburgh, Scotland • May 25 – 28, 2008

CALL FOR ABSTRACTS

Abstract submissions in the areas of formation evaluation listed below are welcome. These topics include interpretation methods, tool and/or measurement physics, and relevant research studies.

- | | |
|---|--|
| 1. Acoustic/Borehole Seismic | 8. High Angle/Horizontal Well Evaluation |
| 2. Carbonate Evaluation | 9. Logging and Measurement While Drilling |
| 3. Cased-Hole/Production Logging | 10. Mineral and Unconventional Resource Evaluation |
| 4. Electrical/Electromagnetic Logging | 11. Nuclear Logging |
| 5. Formation Testing/Sampling/Downhole Fluid Analysis | 12. Nuclear Magnetic Resonance Logging |
| 6. Formation Evaluation/Reservoir Description Methods | 13. Petrophysical Properties/Log and Core Integration |
| 7. Geological Applications/Borehole Imaging | 14. Reservoir Anisotropy/Heterogeneity/Thin-Bed Evaluation |

The VP-Technology would also like to solicit Abstracts for tutorial papers in areas of formation evaluation where the technology and/or interpretation can be especially complex or problematic. These areas include but are not limited to petrophysical evaluation of carbonate reservoirs, low resistivity pay evaluation, and high angle/horizontal well evaluation. The idea is to begin a technical session in such an area with a tutorial talk explaining the problems and assessing the currently available best practices and their limitations. Abstracts submitted for tutorial papers will go through the standard review process.

The information contained in the abstract is the principal basis for the acceptance or rejection of the paper. Notification of acceptance will be made in December 2007. If accepted, the abstract will be published in the April 2008 issue of *Petrophysics*. The paper will be scheduled for presentation at the Edinburgh Symposium, and a complete manuscript will be required for the Transactions by April 4, 2008. **THIS DEADLINE IS FIRM.** As in 2007, paper submissions will be by electronic (on-line) means only. For questions contact Vicki at SPWLA, +1 713 947-8727 or email vicki@spwla.org.

NOTE TO AUTHORS: Complete a separate on-line form for each abstract submitted. It should contain 200 to 400 words. Avoid the use of equations, trademarks, literature references, and supplementary text. Abstract submittal is by on-line submission.

ABSTRACT IS DUE NO LATER THAN OCTOBER 22, 2007

On-line Submission: www.spwla.org
